## A French group dedicated to IT mobility in more than 60 countries

In more than 30 years, PORT Designs Group, comprising several French companies and structured around its complementary brands PORT Designs, PORT Connect, and Naotic, has established itself as a leader in supporting professionals, institutions, and distribution networks.

The group offers a comprehensive range of products covering all professional and educational uses, including transportation and protection solutions (technical luggage), charging and connectivity solutions, ergonomic accessories, security devices, and custom-designed solutions for IT and mobile devices.

### An international presence

With a presence in more than 60 countries, PORT Designs Group relies on an international network of partners and distributors, enabling it to effectively support projects on both a local and global scale.

### Customization & tailored solutions

Solutions tailored to your brand identity and your needs

There are two levels of customization available:

#### Development based on specifications

Our design and engineering teams can develop products tailored entirely to your needs, taking into account your technical, aesthetic, and budgetary requirements:

1 Needs assessment

2 Design

3 Prototype

4 Validation & Service

5 Production

6 Shipping & Customer Service

#### Customization of existing products

A wide selection of products from our catalog can be customized to quickly meet your needs:

- Adding your logo
- Customizing colors and materials
- Dedicated or co-branded packaging
- Specific technical configuration
- Bundles and packaged solutions

This flexibility makes it possible to create high-value-added solutions that are ideal for competitive bids, institutional projects, retail operations, or white-label programs.

Our teams are here to help you evaluate each project and propose the most appropriate solution

The logos and trademarks mentioned are the exclusive property of their respective owners and are used here solely for identification purposes.

## Charging and managing digital device solutions designed and manufactured in France

Nautic designs and manufactures solutions in France dedicated to charging, managing, and securing digital devices: secure charging and storage cabinets, carts and cases to facilitate deployments in education, businesses and local authorities.

With recognized expertise in large-scale projects, the brand supports schools, businesses, and institutions with reliable, scalable solutions designed to optimize device availability and extend their lifespan.

French expertise dedicated to performance and management of IT environments

## Professional technology solutions to connect and optimize the work environments for mobile users

PORT Connect brings together all of the group's mobility accessories dedicated to connectivity, power, and performance of computing devices.

The brand offers reliable and affordable products designed to enhance the user experience and productivity, including docking stations, chargers, audio accessories, peripherals, and ergonomic solutions.

Designed to meet the needs of businesses, IT integrators, and retail networks, PORT Connect positions itself as a practical, competitive, and easy-to-deploy solution tailored for hybrid work environments.

A leading brand supporting the evolution of digital usage and workstations

## A Parisian design studio dedicated to professional mobility

As the group's flagship brand, PORT Designs creates laptops and mobility luggage solutions designed in its Parisian design studio, where functionality, elegance, and trends come together.

Each collection is developed to meet users' practical needs while offering a contemporary aesthetic that enhances the image of companies and organizations.

Combining equipment protection, ergonomics, and style, PORT Designs offers reliable and durable solutions tailored to professional, educational, and retail environments.

A brand that combines design, usability, and performance to support digital mobility

## Designing today to preserve tomorrow

PORT Designs Group is strengthening its commitment to corporate social responsibility through its brands PORT Designs, PORT Connect, and Naotic. Indeed, 100% of the plastic has been eliminated from packaging and replaced with FSC-certified cardboard and biodegradable alternatives such as cornstarch polybags.

In addition, packaging has been redesigned to be up to 7 times smaller, significantly reducing the use of raw materials, the impact of transportation, and the overall carbon footprint.

On the product side, the group continues to evolve its offerings by developing solutions that incorporate recycled materials.

## PET/r-PET Recycling Process

Today, more than 80% of our luggage and accessories collection incorporates r-PET, a material derived from recycled plastic bottles.

This process transforms plastic waste into sustainable textile fibers, which are used to manufacture bags and accessories.

It helps reduce the use of virgin plastic, recover waste, and limit environmental impact.

The LUCIE Progress certification and membership in French Fab demonstrate Naotic's commitment to a structured CSR approach, responsible industry practices, and the continuous improvement of its operations. These recognitions highlight concrete actions in the areas of sustainability, innovation, and performance.

PORT EUROPE has been awarded the EcoVadis Silver Medal, a recognition that places it among the top 15% of companies in terms of CSR performance. This distinction reflects our commitment to advancing our practices in a responsible, sustainable, and transparent manner, for the benefit of our customers, partners, and suppliers.

## French manufacturing at the core of our industrial strategy

PORT Designs Group develops and manufactures some of its solutions in France.

Since the acquisition of Naotic in 2022, this industrial strategy has been strengthened through the partial relocation and local assembly of docking stations and charging solutions.

This approach promotes industrial responsiveness, short supply chains, and the utilization of local expertise, while reaffirming the group's long-term commitment to responsible manufacturing in France.

### Made in France

- Quality and reliability of solutions
- Ability to adapt to specific needs
- Short supply chain and rapid industrial response
- Contribution to employment and the local economy
- Manufacturing and delivery within 15 days

### Scope of Naotic Solutions Manufacturing

- All subcontractors are located within a 200-km radius of the Naotic production site.

The PORT Designs Group leverages its strategic presence in France to manage its operations and support its partners in a way that best meets their needs.

This regional presence is reinforced by a logistics hub located in Strasbourg, ensuring operational efficiency, responsiveness, and optimized logistics flows on both a national and international scale.

## Ensure your IT equipment is always available

## THE NAOTIC OFFERING

### TWO LEVELS OF SOLUTIONS FOR MANAGING AND CHARGING DIGITAL DEVICES

Our solutions secure, charge, and streamline the management of digital devices in schools, local authorities, and businesses.

The Naotic offering is built around two complementary ranges: the advanced Naotic line and the essential Naotic PLUGIN Solutions line.

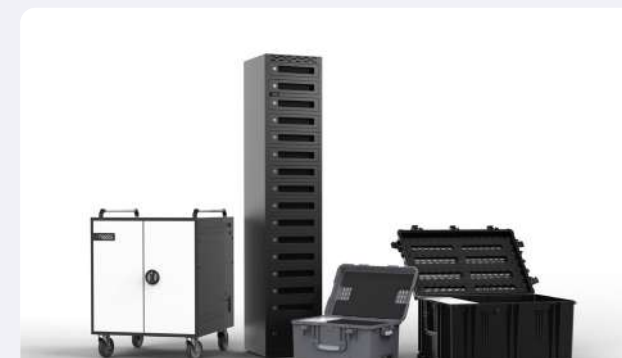

#### NAOTIC RANGE

The NAOTIC line features smart solutions including connected cases, carts, and charging cabinets, **designed and manufactured in France** to manage, charge, and secure tablets, laptops, and smartphones in **demanding environments**.

It maximizes device availability and optimizes the management of digital fleets over the long term.

#### RANGE BENEFITS

- ✓ Solutions tailored for tablets, laptops, smartphones, and digital devices
- ✓ Sturdy and durable design, made in France with recycled materials
- ✓ Advanced charging technologies developed by Naotic (Tabipower® and Smartypower®)
- ✓ Maximized device availability and extended battery life
- ✓ Smart Device Management and Monitoring (Aliabox)
- ✓ Customization, adaptation, and design of tailor-made solutions

#### NAOTIC PLUGIN SOLUTIONS RANGE

The NAOTIC PLUGIN SOLUTIONS line offers **essential and cost-effective** solutions including cases, carts, and charging stations, for charging and securing tablets, laptops, and smartphones **on a daily basis**.

Designed for everyday use, it enables the rapid deployment of reliable and durable solutions for budget-conscious projects.

#### RANGE BENEFITS

- ✓ Solutions tailored for tablets, laptops, and smartphones
- ✓ Reliable and durable design for everyday use
- ✓ Essential features to meet everyday needs
- ✓ Easy to use and quick to set up
- ✓ Excellent value for budget-conscious projects

# SMART CHARGING SOLUTIONS

Remote charging management

## Smartypower®

### PRODUCT HIGHLIGHTS

- Compatible with all your devices via smart outlets that work with your existing chargers
- Remote control for simplified charging management
- Scheduled charging by device groups to optimize cycles, availability, and save energy
- Quick visual overview of the charging status
- Wi-Fi management and scheduling to secure and control usage

Devices always ready to use

Remote charging Control

## Tabipower® C16

### PRODUCT HIGHLIGHTS

- Fast and consistent charging of 16 USB-C devices (up to 65W per port)
- Smart charging to preserve battery life and optimize charge cycles
- Remote control to monitor charging and power consumption
- Direct USB-C connection—simple and hassle-free
- LED indicator showing charging status
- Power consumption data accessible via the app

Smart and Optimized Device Charging

Extended battery life

# CHARGING STATIONS

For smartphones, tablets, and laptops

Tabidock® S20  
for smartphones

Tabidock® T10  
for tablets

Tabidock® P5  
for laptops

24% recycled material

### PRODUCT HIGHLIGHTS

- Self-service charging station
- Custom modular reception area
- Secure cables
- Tabipower® smart charging

## Five Charge™

### PRODUCT HIGHLIGHTS

- Charging station for up to 5 active devices
- Max. power: 65W per port
- Magnetic coiled cables
- Slots for cable retention (Standard, Nano® and Noble Wedge™)

15% recycled material

# COLLECTIVE CHARGING CABINETS

For smartphones, tablets, and laptops

Tabibox® WT1  
for 10 devices

Tabibox® WT2  
for 20 devices

Tabibox® FT1  
for 40 devices

81% recycled material

### PRODUCT HIGHLIGHTS

- Charging cabinet for tablets and laptops
- Storage area with dividers or carrying bags
- Secured with a code lock and master key
- Smartypower® or Tabipower® smart charging

For smartphones

## Tabibox® FS1

66% recycled material

### PRODUCT HIGHLIGHTS

- Charging cabinet for 40 smartphones
- Secured with a code lock and master key
- Tabipower® smart charging

## NAOTIC PLUGIN SOLUTIONS

## 903001

### PRODUCT HIGHLIGHTS

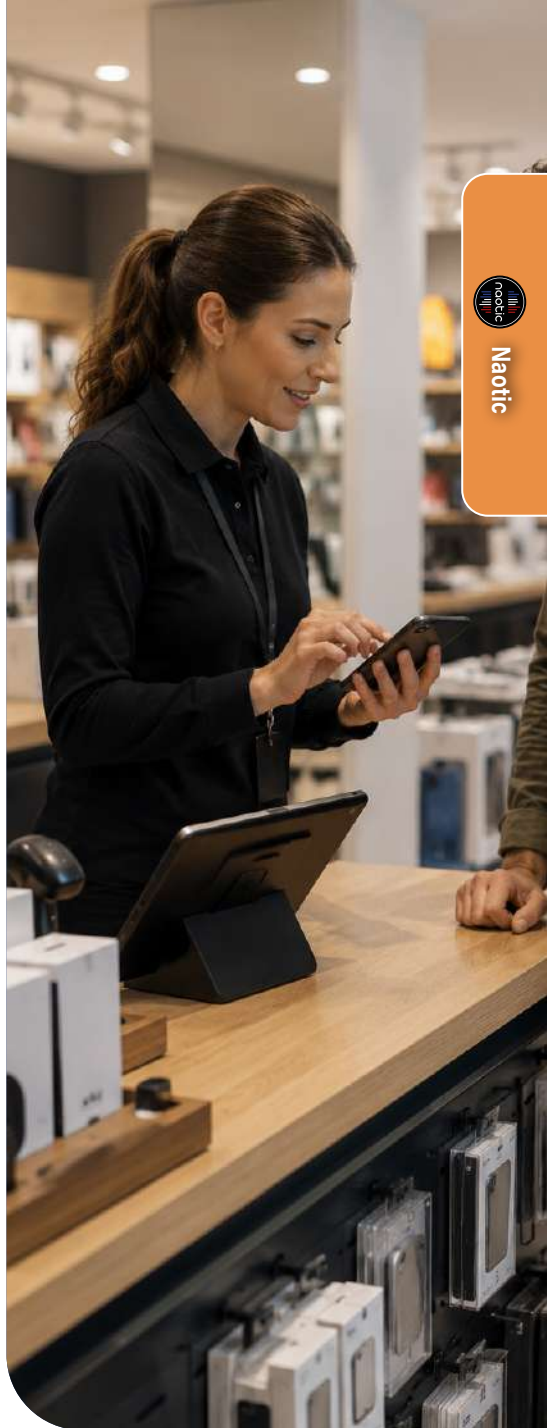

- Charging station for 10 tablets or smartphones
- Remote charging management (via an app)
- USB-A or USB-C charging (30W max per port)

## 903002

### PRODUCT HIGHLIGHTS

- Shared charging cabinet for 10 tablets or laptops
- Secured with a combination lock
- USB-A or USB-C charging (up to 45W per port)

## CHARGING CABINETS WITH INDIVIDUAL COMPARTMENTS

For smartphones

Tabisafe® S10    Tabisafe® S30

### PRODUCT HIGHLIGHTS

- Smartphone charging cabinet
- 10 or 30 individual lockers
- Secured by fixed or free code locks
- **Tabipower®** smart charging

For smartphones, tablets, and laptops

Tabisafe® M10

### PRODUCT HIGHLIGHTS

- Charging cabinet for all types of devices
- 10 standard individual lockers
- Secured by fixed or free code locks
- 3 charging ports (230V outlet, USB-A, and USB-C)
- Remote maintenance option with RJ45 ports
- Compatible with **Tabipower®** smart charging

The **Tabisafe® M** and **Aliabox®** charging cabinets with individual lockers, can **synchronize, maintain** and **update** users' devices.

These cabinets can integrate a network switch and connect devices through RJ45 ports available in each compartment.

### NAOTIC PLUGIN SOLUTIONS

### IT LOCKER

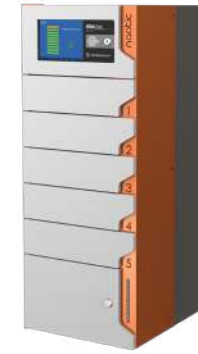

### PRODUCT HIGHLIGHTS

- Charging cabinet for tablets or laptops (13-inch)
- 15 individual compartments with power outlets
- Secured with a key lock or padlock
- Glass doors

## SMART CHARGING CABINETS

For all your electronic devices

Aliabox® 5P

Aliabox® 10P

Aliabox® 5L

### PRODUCT HIGHLIGHTS

- From 5 to 10 standard or large lockers
- Customizable locker configuration
- 2 locker opening modes (RFID or touchscreen PIN code)
- 3 charging ports per locker (230V outlet, USB-A, USB-C)
- Optional remote maintenance via RJ45 connectivity
- Compatible with **Tabipower®** smart charging

## 5 ways to use the Aliabox® that are perfectly suited to how you use your devices:

### Self-access security and recharging tower

Provide lockers for recharging and securing users' mobile devices

### Tower for removing affected equipment

Make mobile devices assigned to users and ready to use available without assistance

### Shared equipment retrieval point with identification

Share, without assistance, available equipment and identify both the user and the returned device

### Equipment collection point by booking

Make mobile devices available for occasional use, without assistance and after prior booking

### Replacement tower for defective equipment

Offer an unassisted replacement of lost, broken or malfunctioning device

## Connected Services for Aliabox®

### Aliaconnect®

- Centralized remote management of cabinets, their contents, and users
- Traceability and operation history
- Remote and automated device inventory

Hosted in France

### Centralized remote management for all your Aliabox® lockers

The **Aliaconnect®** cloud service gives you a clear and controlled view of your deployment. Designed for **Aliabox®** cabinets, this service provides numerous additional features by automatically managing the operations carried out as part of your deployment.

CHARGING CASES

For tablets, laptops, and VR headsets

75% recycled material

for 40 tablets

81% recycled material

16"

**Naocart® S1**

for 20 laptops or 10 VR headsets

36% recycled material

16"

**Naocart® M2**

for 36 laptops

**PRODUCT HIGHLIGHTS**

- Includes carrying bags
- Secured with a code lock
- **Smartypower**® controlled charging or **Tabipower**® smart charging
- Integrated Wi-Fi hotspot

NAOTIC PLUGIN SOLUTIONS

**903003** - for 20 devices

**903005** - for 30 devices

**PRODUCT HIGHLIGHTS**

- Charging cart for up to 30 tablets or laptops
- Secured with a code lock
- USB-C charging (up to 45W per port)

**901973** - for 20 laptops

**901974** - for 30 laptops

**PRODUCT HIGHLIGHTS**

- Cart that holds up to 30 16-inch laptops
- 1x U 19-inch rack with RJ45 ports
- Secured with a code lock
- Charging via AC outlets

**901969**

**PRODUCT HIGHLIGHTS**

- Cart for 40 devices with individual compartments
- Secured with a code lock
- Charging via AC outlets

# EDUCATION

## Trusted expertise in education

Educational environments come with high demands: intensive use, shared equipment, budget constraints, and large-scale deployments.

PORT Designs Group draws on experts in the field to support institutions at every stage of their projects, from needs analysis through deployment. Our solutions are designed to extend device

lifespan, simplify IT fleet management, and meet security and compliance requirements, while adapting precisely to the specific constraints of each institution through advanced customization capabilities.

Combining expertise, support, and a deep understanding of public sector challenges, PORT Designs Group offers reliable, proven solutions and has established itself as a trusted partner for organizations in the education sector.

Easier access to devices

**Options**

**VESA Mounting Plate**

Easily mount your compatible docking station on the back of your monitor.

**2-meter screw-lock cable**

**IT Services :**

**Why choose a manageable docking station?**

A manageable docking station allows you to remotely control and update the stations, simplifying deployment and enabling centralized maintenance. The result: time savings, improved security, and optimized IT management.

# MORE POWER. LESS BULK. MAXIMUM EFFICIENCY.

GaN (Gallium Nitride) technology represents a true revolution in the world of charging. By replacing traditional silicon, it enables higher levels of performance while significantly reducing the size of components.

The result: more compact chargers capable of delivering high power outputs—65W, 100W, 140W, and more, depending on the model—to efficiently power laptops, tablets, and smartphones. Optimized thermal management limits energy loss and reduces heat dissipation, ensuring improved efficiency and long-term reliability.

Thanks to this increased efficiency, a single charger can power multiple USB-C Power Delivery™-compatible devices, simplifying your setup and reducing clutter, whether at your desk or on the go.

POWER SUPPLIES

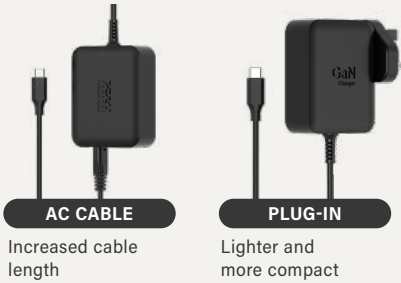

USB-C USB-C GaN

- Automatic voltage selection via USB-C Power Delivery™
- 2 versions available: up to 65 W and up to 100 W
- Compatible with PCs, Mac®, tablets, and smartphones

AC Cable/ Plug-In What's the difference?

An AC Cable consists of two separate components: a power supply and a cable.  
A plug-in charger, on the other hand, combines both into a single unit.

| FOR<br>100W<br>USB-C | Up to<br>100W | AC Cable | 904100CEU  | EU |

Rediscover velvet with the range

# MILANO II

The MILANO II range from PORT Designs combines laptop backpacks and sleeves in a collection that is modern, elegant, and eco-conscious. Crafted from trendy corduroy with refined finishes, it provides optimal protection against bumps and scratches thanks to its padded compartments and soft interior.

Slim, lightweight, and functional, the MILANO II range accompanies your daily journeys in style—from the office to travel—while combining comfort, durability, and a lifestyle-inspired design.
